

#Keready Mobile Health Services for Young People Professional Nurses X3

#Keready's mission is to provide accessible and affordable mobile health services to the youth in South Africa whilst running a movement that speaks frankly about health issues facing young people. Mobile outreach services proved effective during Covid-19 with over a million people reached with vaccinations in informal settlements and rural areas. The Keready campaign was likewise effective in encouraging many young people to get vaccinated. By providing 46 mobile health clinics for outreach, this model will now be used to reach other young people and extend the package of primary health services available to them.

This is made possible through a grant to the Department of Health from the Federal Republic of Germany. DGMT, a South African foundation, is the project implementer, working with the provincial departments of Health in Gauteng, KwaZulu-Natal, Western Cape and Eastern Cape.

DGMT would like to recruit an individual who is passionate about extending health care to underserved communities, focused on young people.

Position: 3x Professional Nurses-Gauteng

The PN's will work together with the Provincial Lead and provide oversight and coordination of the Mobile Unit of the team in their district which support integrated Covid-19 Vaccination Outreach Services in the Province.
